

## Holley Park Academy - Year 2 Miss Hownam

*The end of the Summer term has arrived and Year 2 would like to celebrate our work and achievements. We have had a fantastic year together and I cannot believe the end of Year 2 is here! All of the children have continued to work incredibly hard in all of their learning. Take a look at some of the wonderful things we have been doing ...*

### Literacy

We have used the key skills taught across Year 2 to retell the story of 'The Owl Who was Afraid of the Dark'. We then enjoyed creating our own information leaflets all about barn owls.

### Science

We have been learning about the different habitats where living things make their homes.

We explored our school's woodland habitat to investigate different microhabitats and the minibeasts that live there.

### Numeracy

In Numeracy, we have been learning to tell the time to 5 minutes.

We have explored making tally charts, tables, block diagrams and pictograms to record and interpret data. We have taken our learning outdoors to gather data and draw our own pictograms and keys.

### Geography

In Geography, we have been studying weather patterns across the UK. We predicted the weather forecast and presented it as if we were on the news!

### The King's Coronation

### Sports Day

### SATs

This term, we completed our end of Key Stage 1 SATs. We all worked really hard and did an absolutely fantastic job so we celebrated with a treat at the end of a hard week! Well done SUPERSTARS! ★

Good Luck in Year 3!

From Miss Hownam 😊 x
